'**Child-resistant packages have prevented thousands of poisonings since 1970'**

Date: 05/16/2024

Time1: 27sec

Package: 1

Test: 1.0

With the help of people like you, manufacturers are able to improve the packages we all use, keeping the contents safe from children but easier for the rest of us to open.

As part of this program, we are testing a child-resistant package to determine if it can be opened and properly closed by an adult who is between 50 and 70 years of age. Take your time, and please do not feel that you are being tested; we are testing the package, not you.

Test Description

- I will give you a package and ask you to read the instructions (if any) and open and properly close the package.
- I will then give you an identical package, and ask you to open and properly close it.
- I may ask you to open some other types of packages.
- The packages may be empty or they may contain a product.
- I will ask you whether you think the child-resistant package was easy or hard to use.

Consent Form

The Consumer Product Safety Commission has been using contractors to test child-resistant packages for many years with no injuries to anyone, although it is possible that a minor injury could happen.

I agree to test a child-resistant package. I understand that I can change my mind at any time. I am between the ages of 50 and 70, inclusive.

Test: 20.0

With the help of people like you, manufacturers are able to improve the packages we all use, keeping the contents safe from children but easier for the rest of us to open.

As part of this program, we are testing a child-resistant package to determine if it can be opened and properly closed by an adult who is between 50 and 70 years of age. Take your time, and please do not feel that you are being tested; we are testing the package, not you.

Test Description

- I will give you a package and ask you to read the instructions (if any) and open and properly close the package.
- I will then give you an identical package, and ask you to open and properly close it.
- I may ask you to open some other types of packages.
- The packages may be empty or they may contain a product.
- I will ask you whether you think the child-resistant package was easy or hard to use.

Consent Form

The Consumer Product Safety Commission has been using contractors to test child-resistant packages for many years with no injuries to anyone, although it is possible that a minor injury could happen.

I agree to test a child-resistant package. I understand that I can change my mind at any time. I am between the ages of 50 and 70, inclusive.

As part of this program, we are testing a child-resistant package to determine if it can be opened and properly closed by an adult who is between 50 and 70 years of age. Take your time, and please do not feel that you are being tested; we are testing the package, not you.

Test Description

- I will give you a package and ask you to read the instructions (if any) and open and properly close the package.
- I will then give you an identical package, and ask you to open and properly close it.
- I may ask you to open some other types of packages.
- The packages may be empty or they may contain a product.
- I will ask you whether you think the child-resistant package was easy or hard to use.

Consent Form

The Consumer Product Safety Commission has been using contractors to test child-resistant packages for many years with no injuries to anyone, although it is possible that a minor injury could happen.

I agree to test a child-resistant package. I understand that I can change my mind at any time. I am between the ages of 50 and 70, inclusive.

Date: 05/16/2024

Time1: 12sec

Package: 91

Test: 59.0

With the help of people like you, manufacturers are able to improve the packages we all use, keeping the contents safe from children but easier for the rest of us to open.

As part of this program, we are testing a child-resistant package to determine if it can be opened and properly closed by an adult who is between 50 and 70 years of age. Take your time, and please do not feel that you are being tested; we are testing the package, not you.

Test Description

- I will give you a package and ask you to read the instructions (if any) and open and properly close the package.
- I will then give you an identical package, and ask you to open and properly close it.
- I may ask you to open some other types of packages.
- The packages may be empty or they may contain a product.
- I will ask you whether you think the child-resistant package was easy or hard to use.

**'Child-resistant packages
have prevented thousands
of poisonings since 1970'**

Date: 05/16/2024

Time1: 39sec

Package: 75

Test: 78.0

With the help of people like you, manufacturers are able to improve the packages we all use, keeping the contents safe from children but easier for the rest of us to open.

As part of this program, we are testing a child-resistant package to determine if it can be opened and properly closed by an adult who is between 50 and 70 years of age. Take your time, and please do not feel that you are being tested; we are testing the package, not you.

Test Description

- I will give you a package and ask you to read the instructions (if any) and open and properly close the package.
- I will then give you an identical package, and ask you to open and properly close it.
- I may ask you to open some other types of packages.
- The packages may be empty or they may contain a product.
- I will ask you whether you think the child-resistant package was easy or hard to use.

Consent Form

The Consumer Product Safety Commission has been using contractors to test child-resistant packages for many years with no injuries to anyone, although it is possible that a minor injury could happen.

I agree to test a child-resistant package. I understand that I can change my mind at any time. I am between the ages of 50 and 70, inclusive.

Package: 59

Test: 97.0

With the help of people like you, manufacturers are able to improve the packages we all use, keeping the contents safe from children but easier for the rest of us to open.

As part of this program, we are testing a child-resistant package to determine if it can be opened and properly closed by an adult who is between 50 and 70 years of age. Take your time, and please do not feel that you are being tested; we are testing the package, not you.

Test Description

- I will give you a package and ask you to read the instructions (if any) and open and properly close the package.
- I will then give you an identical package, and ask you to open and properly close it.
- I may ask you to open some other types of packages.
- The packages may be empty or they may contain a product.
- I will ask you whether you think the child-resistant package was easy or hard to use.

Consent Form

The Consumer Product Safety Commission has been using contractors to test child-resistant packages for many years with no injuries to anyone, although it is possible that a minor injury could happen.

I agree to test a child-resistant package. I understand that I can change my mind at any time. I am between the ages of 50 and 70, inclusive.
